

CODEMODEON

INNOVATIVE DIGITAL WORKS

Company

Codemodeon is a creative technology company that produces tailor-made and white label content that engage people with brands and organizations through unique, entertaining, memorable and competitive experiences.

“Be memorable through experience”

People

We are coders, engineers, makers and designers who are extremely passionate about creating immersive and interactive experiences by utilizing breakthrough technology in VR, AR, MR and human-computer interaction.

What we believe?

We sense, feel, think, act and build relations.

These are things humans basically do by their nature.

Creating a well-designed, purposeful, human-friendly experience; activates senses, generates feelings, creates thoughts, triggers actions, and thus makes people build relations about the subject of the experience. These relations are **unique**, **impactful** and **unforgettable** because they are **real**.

We work to let people, brands and organizations to get benefit from this powerful concept.

Featured Products

Header Goal VR

King of Hoops VR

Mission Jetpack VR

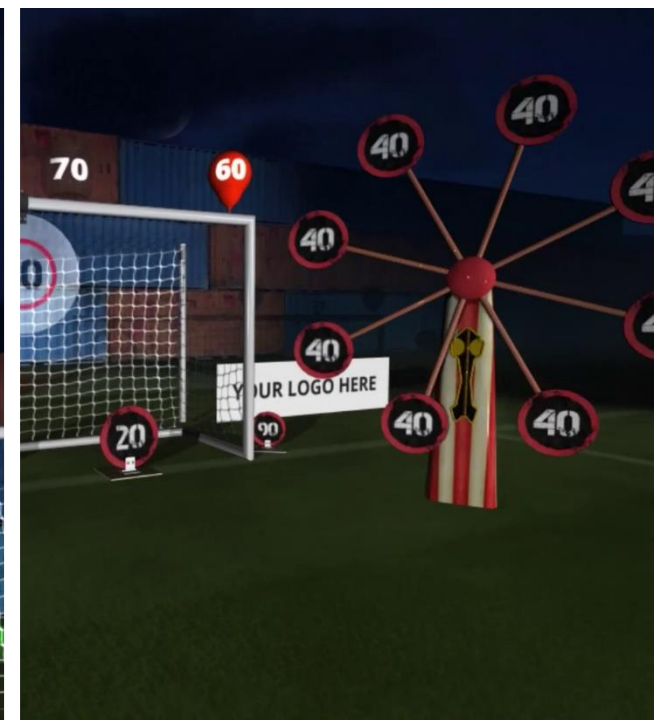

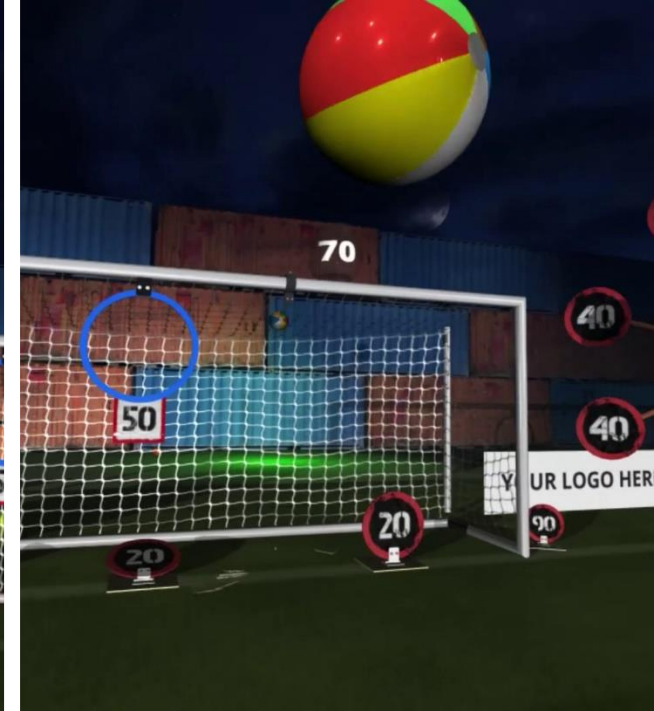

Header Goal VR

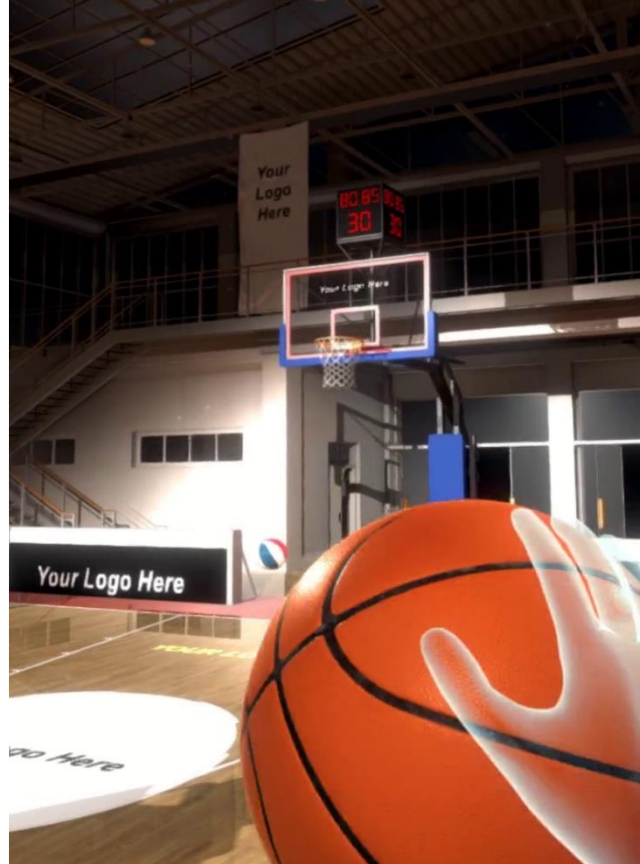

"Being able to hit a virtual ball in the most natural and realistic way makes Header Goal VR the most entertaining way of heading a ball."

Header Goal VR is a physics based virtual reality sports game with lots of fun. It's beyond football, you will hit drones, break glasses, explode TNTs.

King Of Hoops VR

"You are on fire! Now it's time to show some basketball skills! "

King of Hoops is a virtual reality basketball shootout game. There are 5 different positions with 5 balls for each. In addition to the challenging concept, incredibly high fun-factor of King of Hoops raises the bar to the top in terms of event entertainment.

📺 <https://vimeo.com/225804056>

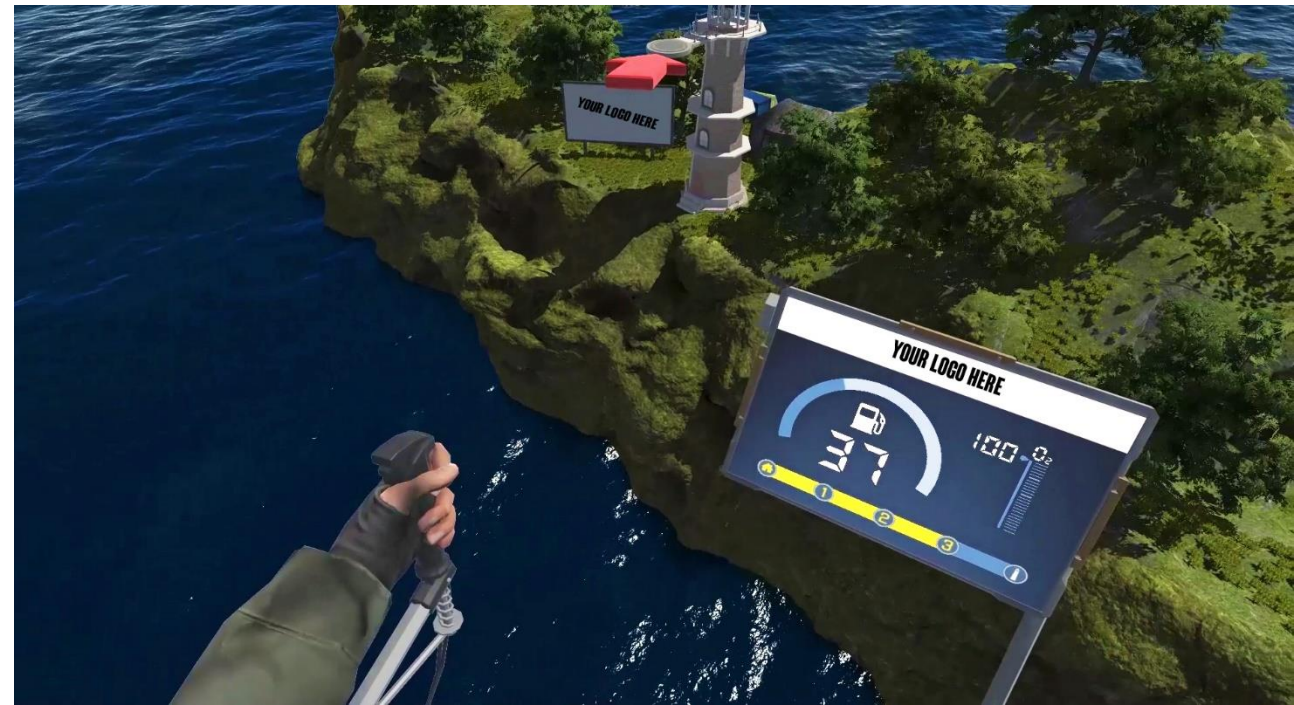

Mission Jetpack VR

"Two tropical islands facing each other and one mission to complete... With your Jetpack of course!"

Mission Jetpack is a game in which you can experience the concept of riding a jetpack over a beautiful environment. Collecting items and passing checkpoints while keeping eye on the fuel tank of your jetpack is a fun challenge.

”Making a presentation in mixed-reality form”

Mixed Reality On Stage

By utilizing virtual reality, we wanted to enhance the experience of watching a presentation and making it unique. To let everyone to have the same experience at the same time we planned to build a mixed-reality setup on the stage. Hereby the audience would watch a presentation in mixed-reality format while the presenter is experiencing virtual reality.
