

**There is no “no”
in our world.**

We connect digital experiences, creators and transformations.

We are powered by a universe like NO other.

01 / **WE ARE** NONOCO

#wearenonoco WHO WE ARE

Capturing the new generation and building the world of your dreams on a solid foundation.

With this innovative mission, we aspire to find lasting solutions for our customers, to make a difference in the software world and most importantly to meet our talents.

#wearenonoco OUR VISION

✕ Consultancy

While big picture plans and decks may seem impressive, it takes great execution to truly make them shine.

✕ Design Shop

While beauty can be an asset, winning apps are ultimately determined by their functionality and seamless execution of features.

✕ Dev Shop

Having top-notch engineering is crucial, but it's the substance of the features, rather than their functionality or volume, that defines success.

✕ Product Shop

Just like the best startups, we're product-led. This means we prioritize features and users above all else, with the help of experienced design and development teams.

#wearenonoco

WHAT WE DO

UI-UX

We use universal design principles and best practices to maximize human-technology interactions.

Wireframing, Prototyping, User Experience Design, Responsive Design, Interaction Design, User Interface Design

FRONT-END

We provide universal standards, responsive layout, component-based development, modern JS framed PWAs, scalable CSS infrastructure.

Prioritizing user experience, Bringing a concept to life with HTML, CSS, JS, Production and maintenance of web apps

MOBILE

We harness the power of mobile for you to stay ahead of the competition with the latest technologies.

Wireframing, Prototyping, User Experience Design, Responsive Design, Interaction Design, User Interface Design

BACK-END

Our experience comes from robust yet scalable solutions such as API design and DevOps. We can provide SOLID development, RESTful API, scalable architecture, third party integrations.

New and legacy applications meet quality standards, Manage APIs resources, Improve user experience, Write unit and UI tests

#wearenonoco

HOW WE DO IT

✕ Design

A harmony of magic hands and colorful minds. Design is one of NoNo's strongest muscles. The design that comes after the preparation of the schematic and the completion of the research is as enjoyable as the first coffee of the day.

Coding ✕

Every designed pixel has powerful code behind it, and every designed pixel is encoded with no margin for error. NoNo difference.

✕ Research

Research is not just about doing research. We scrutinize every point of the schematic of the idea, examine its dynamics now and in the future, and set off on our way.

Testing ✕

We test our product 360 degrees from A to Z on every device, on every scanner, in every condition and under every circumstance. In this way, we eliminate all the problems you may encounter during the test phase.

About Food Processing and Packaging Machinery Trade Fairs

Founded in 1883, Amsterdam RAI is situated in one of the main business hubs of Europe. The accessibility of the venue from abroad is guaranteed by the proximity of Schiphol International Airport, ranking as the 5th busiest airport in the world in terms of international passenger traffic. The convenient location of Amsterdam RAI near the city centre with Amsterdam's famous cultural and historical attractions, combined with numerous public transport links, provides the perfect setting for any event.

Amsterdam RAI offers 300,000 sq. metres exhibition space, divided into 13 multifunctional halls and 64 conference and meeting rooms. In addition, more than 4200 parking spaces are available. As every year, in 2018 the expo centre will host over 600 trade fairs and conferences of various size, covering diverse industry sectors. Some of the most notable events will include IBC, INTERTRAFFIC Amsterdam, ISATA/Vechnica Amsterdam and AGU/TECH-AMSTERDAM.

Benefit from our booking experience

We help companies lower their expo hotel booking costs - typically by 15% or more - by negotiating with all major hotel chains and independently owned hotels. In addition, we cooperate with the biggest wholesaler accommodation systems which enable us to reduce your travel costs even further based on the volume of rooms we sell for each event.

WHAT WE DO
Our Pragmatic Solutions

Discover our Industrial, IoT, Fintech Solutions.

OpticonAI

COMPUTER VISION TECHNOLOGIES

OpticonAI is a PaaS (Platform as a Service) that performs sub-millimeter level accurate measurement of practically anything. Input data from industrial cameras are interpreted by advanced algorithms for numerous purposes such as Pattern Matching, Geometric Model Finding, Shape Finding, Feature Extraction, Classification, Multi Dimensional Measurements, Color Analysis, Surface Continuity Analysis, Character/Text Recognition, Barcode and QR Code Extractor, 3D Point Cloud Generation and more.

ShieldX

PragmaTech

FEATURE EXTRACTION

This technique is used to identify features of objects and isolate the ones that don't comply with the set features using Edge Detection and Blob Analysis.

GEOMETRIC MODEL FINDER

This technique is used for locating a model by performing Contour Analysis.
